# INSTRUCTIONS TO AUTHORS

„Economy and Market Communication Review –

Časopis za ekonomiju i tržišne komunikacije“

E-mail: [redakcija@emc-review.com](mailto:redakcija@emc-review.com)

Web: [www.emc-review.com](http://www.emc-review.com)

The scientific international journal „Economy and Market Communication Review – Časopis za ekonomiju i tržišne komunikacije“ - journal for economy and market communication (ISSN 2232-8823 print; 2232-9633 online) was launched in 2011.

Economy, sustainable economic and social development, as well as market communication is at the heart of contemporary societies' interests. The SEE Region Journal publishes scientific and professional papers covering a wide range of topics available in the fields of global economy, business economics, social development, markets and competition, consumers, media and business communications, new technology, management, marketing, all in favour of improving existing knowledge, stimulating discussion and reflection on contemporary topics in these areas. The journal focuses on these topics from the perspective of different theories, policies and practices, and promotes an interdisciplinary approach.

The journal for economy and market communication (EMC Review) is an international peer-reviewed, open approach (OA) journal dedicated to the highest professional and ethical standards, including zero tolerance for plagiarism culture and other unacceptable forms of activity.

The journal is published twice a year (in June and December). The deadline for submitting papers for June is March 30th and 30th August for December edition. They can be submitted to the following email address: [redakcija@emc-review.com](mailto:redakcija@emc-review.com). The paper must not be under review and/ or published by another journal. When submitting your paper, you must indicate the author who will be in charge of correspondence at all stages of the review and publication processes, as well as his/her contact details (telephone numbers, email and full postal address). In one paper can only participate three authors at most.

The manuscripts are sent to the journal redaction and are published in languages of the people of Bosnia and Herzegovina or English, in Latin script. In order for a paper to be published, it must be fully in line with the Instructions to Authors and must be positively reviewed by at least two independent anonymous reviewers (Instructions to Reviewers).

Authors must respect the scientific methodology when writing their papers. All papers received are forwarded to the members of the Editorial Board for their evaluation, as well as to the experts outside the Editorial Board in case of a specific content of the text. Following their evaluation, the editor in chief proposes to the Editorial Board decisions for further actions as follows:

- I. Which papers to reject,
- II. Which papers to return to the authors with suggestions, recommendations and remarks on how to improve their text prior to sending it for peer review,
- III. Which papers to forward for peer review.

The authors are notified of the decision of the Editorial Board via email. After their manuscript has been accepted for review, the authors must sign the Statement of Authorship and Copyright, which they then must return via email to the Editorial Board. By signing it, the authors confirm the authenticity of their article and copyright and acknowledge the reviewing process.

The papers which are forwarded for review are sent to at least two anonymous reviewers. Peer review means that reviewers are unaware of who the authors of papers are, as is the case with authors.

With this statement, the editorial board will send the invoice to the correspondent author to pay the costs of the review process. The costs of the review procedure for one paper is 100,00 €, or 200,00 KM (no matter how many authors are at paper and whether they come from the country or abroad). The paper will not be submitted for review until the author has submitted a signed statement and proof of payment of the costs of the review process.

Following the review, should reviewers request so, the paper is sent back to authors to be amended. If they exist, the reviews are only submitted to the author after both have been received. Besides taking on board the comments and suggestions of reviewers, the authors must also submit a supporting letter in which they list the changes made to their paper, linked with the corresponding page where these have been done. The corrected paper and the supporting letter are sent to the Editorial Board via email.

After the author has resubmitted the paper, it is sent to the reviewer for opinion. In situations when reviewers are not in agreement relative to their opinion on the paper's suitability for publication and/or its classification, the decision will be rendered by the Editorial Board upon a proposal by the editor in chief.

Upon the proposal by reviewers and in line with the decision by the Editorial Board, the papers are classified into four categories:

- I. original scientific paper, which contains the results of an original scientific research unpublished to date;
- II. preliminary report, which contains the new results of a scientific research, useful to be published promptly;
- III. review, which contains an original, concise and critical review of an area and provides a contribution given the papers published to date;
- IV. professional paper, which contains useful contributions from and for the profession but does not necessarily represent an original research.

Upon the positive decision on publishing, and following proofreading and editing, the paper shall be submitted to the authors for their opinion and check prior to publication. The author may, upon request, be issued with an appropriate confirmation of the status of his paper. The table "Structure and Form of Paper" provides detailed instructions to authors in relation to the technical layout of the paper, as well as to its recommended structure.

## Structure and form of paper

<b>Cover paper</b>	Must include the title of paper, name of author, his/her academic title, name and address of institution where the author works, position and contact details in both Bosnian/Croatian/Serbian and English (if the paper is written in languages of the people of Bosnia and Herzegovina ).	
<b>First page</b>	Must include the title of paper, abstract, key words and JEL classification.	
	Abstract	<p>a) If the paper is written in the languages of the people of BiH, the abstract will contain between 150 and 300 words. At the end of the paper, an extended summary (English version) is written behind the list of references, which should be 400-500 words long. The abstract is written in the third person, in one paragraph and must contain: (1) the aim of the research, (2) research methods, (3) the basic result of the research, and (4) the conclusion of the research.</p> <p>b) If the paper is written in English it is not necessary to write a summary at the end of the paper, while the other rules for writing the abstract are the same as under a)</p>
	Key words	Key words are written in both languages of the people of BiH and English (if the paper is written in the languages of the people of BiH ) and must contain the gist of the paper. Up to 5 key words should be provided.
	JEL classification	JEL classification is provided under the key words in both languages of the people of BiH and English (if the paper is written in languages of the people of BiH) in accordance with the Journal of Economic Literature classification (available at <a href="https://www.aeaweb.org/econlit/jelCodes.php?view=jel">https://www.aeaweb.org/econlit/jelCodes.php?view=jel</a> ).
<b>Recommended structure of paper<sup>1</sup></b>	1. Introduction	It should define the problem, subject matter and aim of research, as well as the motive for undertaking such research. The Introduction should also offer one or several hypotheses of the paper, which should be developed in the final chapter of the paper – the Conclusion. The Introduction ends with the description of the paper’s structure.
	2. Literature overview	Literature Overview involves the overview of relevant literature in the area of the paper, with key knowledge available to date or relevant results of research conducted to date. Exceptionally, the author may include Literature Overview in the Introduction.
	3. Methodology	Methodology must be described clearly and precisely, the methodological contribution of authors (if available) must be established and it must all be done in a fashion that it allows for its testing by other authors.
	4. Empirical evidence	Empirical evidence represents the documentation background to the research conducted.
	5. Results and discussion	Results and discussion represent part of the paper in which results of the research conducted are explained and compared to similar research, the limits of the interpreted results are analysed, as are their significance and potential implications.
	6. Conclusion	Conclusion is the final chapter of the paper. It should not be confused with the paper’s abstract. It should contain the elaboration of the original hypothesis, the evaluation of the results of research, its contribution, the overview of limitations and problems relative to research implementation, the guidelines for future research, the recommendations stemming from the results of research etc. As is the case with abstract, the Conclusion should be contained in one paragraph.

<sup>1</sup> Depending on the specifics of the topic, and in agreement with the Editorial Board, the paper may be conceptualized differently.

Literature

The list of literature should be provided at the end of paper, and it should only contain those titles which are referred to by the author throughout the text. It should be provided in the alphabetical order of the last name of authors of the mentioned works with no classification per types, and data on the work must be complete, in accordance with the standards of bibliography. If several works of the same author have been published in the same year, the year should be accompanied by designations "a,b,c".

The used literature should have at least 15 sources for review scientific papers, while for all other papers there should be at least 10 sources. The bibliography should be of a recent date.

It is recommended that the authors refer to sources of papers previously published in the EMC Review (<http://www.emc-review.com>), as well as those referenced by the Institute of Science Information.

Use APA style (<http://www.apastyle.org>) to write references for text and literature references.

Examples of citations:

Books: last name, initials of the author's first name. (year) Title. Place of publication: name of publishers. (if there are two or three authors, their last names and initials should be listed in order, separated by a comma)

<b>Technical instructions</b>	<ul style="list-style-type: none"> <li>– The paper should be written in Microsoft Office Word programme (MS Office Word 95 and later versions).</li> <li>– Page format is A4 with single line spacing (including footnotes and references). The margins are 2.5 cm.</li> <li>– The font type and size should be Times New Roman 12.</li> <li>– The text should be justified and a single line spacing must separate paragraphs.</li> <li>– The paper should be between 30.000 characters or 16 pages. If agreed with the Editorial Board, the paper can be up to 50.000 characters long.</li> <li>– The paper must be written using standard language with no spelling or grammar errors.</li> <li>– The title of paper must be written in capital letter, bold ,font size 16.</li> <li>– The names of authors must be written in bold, font size 14.</li> <li>– The headings of chapters, from Introduction to Conclusion, should be in bold. Headings and subheadings should not be numbered.</li> <li>– Subheadings can be of maximum level three.</li> <li>– Figure, tables, equations and charts that are an integral part of the paper must be clearly designed and entitled, and their source and number must be clearly stated. They should be enumerated in continuity using Arabic numerals. The titles should be written above the figure, table or chart using bold font size 11. Sources are provided below the figure, table or chart using font size 10.</li> <li>– Footnotes are used to explain the man text, rather than to name the source of literature.</li> <li>– In accordance with APA standard, Literature used is referred to throughout the text by placing between the brackets the last name of the author and the year of publication, for example: (Rodrik, 2008), and in case of quotations, the page number should also be added (Rodrik, 2008:78). Each note is stated as for the first time. If there are two authors, both last names are provided in brackets; if there are several authors, only the first one is mentioned: (Rodrik et al, 2008). Each reference must be listed in the list of literature.</li> <li>– <i>MS Office Word tools in the References - Style menu options: select the APA menu.</i> Manuscripts that do not have this option activated when marking citations, references and literature will be returned to the authors for correction.</li> <li>– Do not specifically mark some words in the work, parts of the work, etc. in bold, italic or any other formatting.</li> </ul>
